

10,000 B.C.

WE'RE AT THE BEGINNING OF CIVILIZATION. DURING THE NEOLITHIC, HUMANS BEGAN TO DEVELOP AGRICULTURE AS A MEANS OF SUBSISTENCE.

HA HA HA, WHAT A LOOK! THEY'RE SO RIDICULOUS!

WE CAN SAY THAT THIS WAS ONE OF THE 3 'GREEN REVOLUTIONS' THAT BOOSTED AGRICULTURE.

LOOK, HE'S NOT LAUGHING NOW, HEE HEE

HE LOOKS SO CUTE!

7,000 B.C.

IN THE OLD EGYPT THEY HAD A GREAT RICHNESS IN AGRICULTURE.

THANKS TO THEM WE HAVE THE FIRST CROPS, WHEAT AND BARLEY, AMONG OTHERS.

LOOK GUYS, THERE THEY STARTED TO USE ANIMALS TO CULTIVATE.

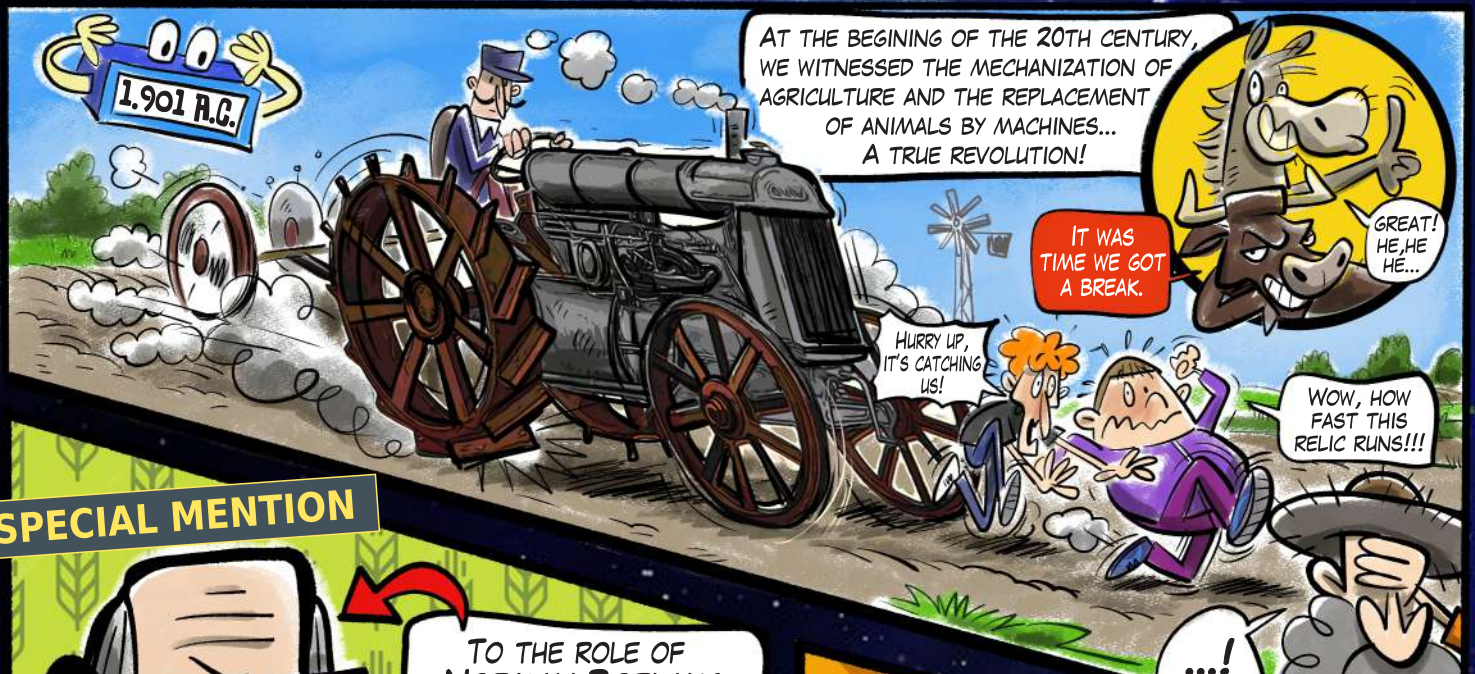

1,492 A.C.

THE DISCOVERY OF AMERICA WAS ALSO VERY IMPORTANT FOR AGRICULTURE. THANKS TO THAT THERE WAS AN EXCHANGE OF CULTIVARS BETWEEN AMERICA AND EUROPE. THIS FACT EVOLVED AGRICULTURE IN THE TWO CONTINENTS.

OH, I'M SO THRILLED BY THEIR ENTHUSIASM...

LIGHHHH. THIS IS SO BORING...

AT THE BEGINNING OF THE 20TH CENTURY, WE WITNESSED THE MECHANIZATION OF AGRICULTURE AND THE REPLACEMENT OF ANIMALS BY MACHINES... A TRUE REVOLUTION!

IT WAS TIME WE GOT A BREAK.

GREAT! HE, HE HE...

HURRY UP, IT'S CATCHING US!

WOW, HOW FAST THIS RELIC RUNS!!!

SPECIAL MENTION

TO THE ROLE OF NORMAN BORLAUG AND HIS 2ND 'GREEN REVOLUTION'. IT INCREASED GLOBAL FOOD PRODUCTION AND SAVED MILLIONS OF PEOPLE FROM FAMINE!

THE ALLIANCE BETWEEN TECHNOLOGY AND AGRICULTURE BEGAN TO BOOST CROP PRODUCTION IN THE 20TH CENTURY.

IN THE 80'S, THE 3RD 'GREEN REVOLUTION' BEGAN, GIVING RISE TO GENETIC ENGINEERING AND THE FAMOUS TRANSGENIC PLANTS.

CONTROVERSIAL FOR SOME AND BENEFICIAL FOR OTHERS, BUT A REALITY IN ANY CASE.

NOWADAYS, THE 4TH "GREEN REVOLUTION" IN AGRICULTURE IS LOOMING, WITH THE USE OF BENEFICIAL MICROORGANISMS AND MORE SUSTAINABLE AND ENVIRONMENTALLY FRIENDLY STRATEGIES. PERHAPS THE NEXT STEP WILL BE FARMING ON THE MOON AND OTHER PLANETS...

WHO KNOWS?

OOPS THIS LOOKS FISHY...

ARE YOU SURE WE DIDN'T FORGET ANYBODY?

NO, I DON'T THINK SO, HEHE

END
